Example 1

Graph, identify the kind of system, and describe the graph of the following system of linear equations:

$$\begin{cases} x + y = -2 \\ 2x + 2y = -4 \end{cases}$$

Example 1

Step 1: Identify the x-intercept and y-intercept of each equation in the system.

First equation

$$x + y = -2$$

Example 1

Step 1: Identify the x-intercept and y-intercept of each equation in the system.

First equation

$$x + y = -2$$

Find the x-intercept:
